Problem Statement

We found that it is difficult to find local jobs for students and still find a a work/school balance

Details:

We want to create a website or app that shows options for part time jobs for students that don't have easy access to a vehicle whether to work for ride share services or to travel to off campus jobs. This will be useful to students especially freshmen who likely don't have the means or ability to travel, but still have many college based expenses.
